BUREAU OF THE CENSUS
Richard M. Scommon, Director

SUMMARY REPORT
FT 950-1

August 1963

FOR RELEASE
October 15, 1963

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States general imports, unadjusted for seasonal variation, from \$1,504.6 million in July to \$1,461.2 million in August¹, reflected decreases in imports from some areas which were partly offset by increases in imports from others. Changes in the dollar values of imports from all areas from July to August were as follows: Western Europe, from \$433.6 to \$364.9 million; Canada from \$338.0 to \$334.5 million; Latin American Republics, from \$274.3 to \$290.2 million; and "all other countries" from \$458.7 to \$471.6 million.

From July to August, imports from O.E.C.D. countries in Europe fell from \$424.3 to \$358.2 million, while those from sterling area countries declined from \$287.6 to \$280.9 million. Decreases were reported in imports from the continents of Europe, North America, and Australia and Oceania.

The drop in imports from Europe from \$442.1 million in July to \$371.0 million in August was largely accounted for by decreases in imports from individual countries of this continent as follows: West Germany, from \$92.3 to \$75.1

million; United Kingdom, from \$100.9 to \$89.8 million; France, from \$44.9 to \$35.8 million; Sweden, from \$17.2 to \$9.9 million; Belgium and Luxembourg, from \$38.4 to \$31.8 million; Switzerland, from \$21.0 to \$15.1 million; and Norway, from \$11.3 to \$6.8 million. Imports from North America decreased from \$467.5 to \$444.0 million. This change was primarily due to decreases in imports from Dominican Republic, from \$18.3 to \$13.3 million; Netherlands Antilles, from \$23.6 to \$20.0 million; Canada, from \$338.0 to \$334.5 million; and small scattered decreases in imports from most of the other individual countries of this continent. Imports from Australia and Oceania decreased from \$53.2 to \$48.7 million as a decrease in imports from New Zealand and Western Samoa, from \$25.1 to \$17.2 million, was partly offset by an increase in imports from Australia, from \$27.9 to \$30.8 million.

The increase in imports from South America from \$196.9 to \$224.8 million reflected increases in imports from Colombia from \$20.7 to \$28.8; Chile, from \$14.5 to \$22.3 million; and Venezuela, from \$78.4 to \$83.6 million. Imports from Asia increased from \$283.3 to \$306.2 million primarily as a result of increases in imports from the Republic of the Philippines, from \$35.8 to \$44.2 million and Federation of Malaya from \$13.8 to \$17.0 million. Imports from Africa advanced from \$61.4 to \$66.4 million as a rise in imports from the Republic of South Africa, from \$23.3 to \$30.8 million was partly offset by a decrease in imports from British East Africa and Tanganyika, from \$7.3 to \$4.1 million.

¹On a seasonally-adjusted basis, total general imports were valued at \$1,532.5 million in August as compared to \$1,469.2 million in July. (See the August 1963 issue of Report No. FT 900-1). Seasonally-adjusted data are not available by country of origin.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through United States Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from in transit merchandise only in the manner in which it is documented.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, landing, or the country to which mixed lots of various origin are consolidated. It follows, therefore, that imports from such merchandising or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude

United States import duties. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data (i.e. formal entries valued under \$100 and all informal entries valued under \$250), and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all import entries. The probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than 1 percent of the individual totals shown.

In addition to the effects of sampling variation, and the difficulties described above under COUNTRY DEFINITION, monthly import statistics are subject to some error from such sources as the carry-over of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Reports No. FT 110 and FT 120. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: AUGUST 1963 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Data revised to reflect all corrections published with the statistics through those for December 1962. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts.)

^a Latin American Republics. ^b Sterling area countries. ^c Western Europe. ^d O.E.C.D. (Organization for Economic Co-operation and Development) countries in Europe. * Indicates less than \$50,000. ¹ For definitions of countries as used in this report, refer to current edition of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics.

² The 1962 monthly average figures shown exclude February 1962 data on \$1-\$99 formal and \$1-\$250 informal entry shipments which are estimated as totaling about \$9.7 million. Data on these shipments are also excluded from the individual area, continent, and country totals shown in this report and from the data in FT 930-1, FT 110, FT 120, IM 145, etc. ³ Effective with the statistics for July 1962, the country designation "Portuguese Asia, N.E.C.", comprising Goa, Damao, Diu and Portuguese Timor became obsolete. Beginning with the September 1962 issue of this report, data for Goa, Damao, and Diu are shown separately while data for Portuguese Timor are included, along with data for other countries, in the figures for "Southern and Southeastern Asia, N.E.C." ⁴ Countries which could not be identified.
